Home boarding for dogs licensing: statutory guidance for local authorities

Updated 7 February 2022

Contents

Minimum standards
Higher standards
Part A - General conditions (Schedule 2 of the Regulations)
Part B - Specific conditions (Schedule 2 of the Regulations) - providing home boarding in a dwelling or in a boarding kennels
Appendices

Print this page

This guidance is for local authority inspectors in England. You should read it alongside the Animal Welfare (Licensing of Activities Involving Animals) (England) Regulations 2018.

To decide if an activity is covered by the regulations and needs a licence to operate, you should consider all the following guidance:

All dog home boarding activities have a licence if they're carried out as a commercial business.

To decide if an activity is commercial, you need to consider:

- is the activity carried out for profit or does it include a profit
- is the activity carried out on a large scale

You should also consider HMRC's Badges of trade.

If someone has a trading income below the HMRC trading income allowance, they do not need to consider if it is a business.

If someone has a trading income above the HMRC trading income allowance, they should consider if it is a business.

Similar to a case, the case-by-case basis for other people's dogs at home for day and overnight stays (home boarding).

This must be made a business home which is not:

- the usual home where the animals are kept
- in outdoor kennels

It does not include breeding a dog under a condition of the Animal Health Act 1981.

Businesses which arrange for the provision of accommodation for other people's dogs will also be in scope. This includes franchises and businesses which connect pet owners with people willing to take their animals for the day.

The accommodation provided in these circumstances must meet the conditions in Schedule 2 of the Regulations. The local authority should consider if it is a business. The local authority needs to be satisfied that the conditions are met in all of the accommodation provided.

Contact the Local Government Animal Welfare Group for non-statutory guidance on the application of the regulations.

Every business must keep an up-to-date list of all their premises where they carry out activities covered by the Act (DEFRA 2018).

Activities that fulfill one or more of the following criteria do not require a licence:

- veterinary practice where the activity is part of the treatment of the animal
- a person who provides care for dogs outside a home environment (Case Law - Kennels of providing day care for dogs)
- businesses that look after the dog within its normal place of residence, such as a dog walker
- people who have trained and have a trading income below the current HMRC trading income allowance
- a lab must be boarded under a vet boarding licence

Minimum standards

It is expected that all businesses will meet and maintain minimum standards. If an inspector finds that an activity does not meet these, they will not comprehend within standards, follow the risk-based approach to prosecutions.

To grant a new and renewal licence for home boarding dogs, you must check that businesses meet all the minimum standards in this guidance.

Higher standards

Businesses that meet the higher standard will get a 4 or 5 star rating in the premises activity star rating scheme.

Higher standards are required or optional.

To qualify as meeting the higher standards, the business needs to achieve all the required higher standards as well as a minimum of 50% of the optional higher standards.

If a business meets the higher standards, they will qualify for a longer licence that is valid for 2 or 3 years rather than one year. This covers the cost of the licence.

See Scorecard for premises activities guidance for local authorities, for an explanation of the animal welfare star rating system and how it incorporates a risk assessment of the business.

Part A - General conditions (Schedule 2 of the Regulations)

Paragraph numbers relate to the conditions in the schedules of the regulations.

1.0 Licence display

1.1 A copy of the licence must be clearly and prominently displayed in any premises used to the licensable activity.

The licence must be displayed in a public facing area of the premises such as, the entrance or reception area.

The licence holder must provide a list of their associated premises.

Details of any changes to the list of associated premises must be reported to the local authority within 30 days of the change.

1.2 The name of the licence holder followed by the number of the licence holder's licence must be clearly and prominently displayed on any website used in respect of the licensable activity.

2.0 Records

2.1 The licence holder must ensure that at any time all the records that the licence holder is required to keep as a condition of the licence are available for inspection by an inspector or a police and legible form or, where any such records are stored in a computer, in a form in which they can readily be produced in a visible and legible form.

2.2 The licence holder must keep all such records for at least 3 years beginning with the date on which the record was created.

Electronic records must be backed up.

3.0 Use, number and type of animal

1.1 No animals or types of animal other than those animals and types of animal specified in the licence may be used in relation to the relevant licensable activity.

This licence applies only to providing home boarding for dogs. If you are concerned about the welfare of other animals then you should inform the relevant person in the local authority. The police or a relevant animal welfare organisation.

2.2 The number of animals kept for the activity at any time must not exceed the maximum that is reasonable taking into account the facilities and staffing on any premises used for the licensable activity.

The licence must state the maximum number of dogs that can be boarded at the premises. Undocumented numbers are a breach of the licence, especially if they're not reflected in increased staffing or facilities.

Each dog from the same family unit must have access to a room where it can relax, go to the toilet and be fed separately from other dogs. Dogs from different families in the premises in shared. Rooms must be high enough for a human adult to stand in.

Dogs must not be home boarded in:

- a conservatory
- a bedroom in which the usual occupant is below the age of 16
- a garage (unless converted to a standard suitable for a human to live in)
- a cellar/attic
- a garage (unless converted to a standard suitable for a human to live in)
- a off-plans conversion (converted suitable for a human to live in)
- a balcony
- an outside building, structure or shed

Hallways and bathrooms can be used as designated rooms as long as the other conditions in this guidance can be met, such as space requirements, temperature and ventilation.

If a barrier is used to divide a designated room, this can be used as multiple spaces as long as each space meets the conditions in this guidance.

Dividing barriers must be:

- fixing fixed to the walls
- at least 1.83 metres high
- use wire mesh no larger than 50 millimetres by 50 millimetres.

Each divided space must have a floor area of at least 6 square metres.

Other dogs in the accommodation should be considered as part of the number of dogs that can be reasonably cared for under a home boarding licence.

Optional higher standard for the home:
Bathrooms, hallways and partitioned rooms are not used as designated rooms.

4.0 Staffing

4.1 Sufficient numbers of people who are competent for the purpose must be available to provide a level of care that ensures that the welfare needs of all the animals are met.

Staffing levels must ensure that each dog's individual welfare needs can be fully met and properly boarded. Breed specific needs requirements must not be compromised by a lack of staff.

There must be at least one competent person to help with care and supervision if the licence holder is absent for an extended period.

Each member of staff should have 10 dogs or less to care for.

4.2 The licence holder or a designated manager and any staff employed to care for the animals must be able to demonstrate a level of knowledge and understanding for which they are using and to recognise signs of, and take appropriate measures to mitigate or prevent, pain, suffering, injury, disease or abnormal behaviour.

Staff must be trained in:

- animal welfare, including recognising poor welfare
- animal handling
- dog behaviour
- injections and sedation
- feeding and food preparation
- disease prevention and control
- recognising sick or injured animals
- giving first aid treatment to animals

There must be a record of all staff training.

Staff must other:

- hold a formal qualification such as Level 2 Qualifications and Examinations Ofqual (Regulated Qualifications Framework) (RQF) Level 2 or higher
- show they have relevant and sufficient knowledge and experience

Where no accredited training courses exists for an activity, other evidence of training must be provided, such as industry assessment schemes.

Staff who have taken an Ofqual-regulated qualification must show that they have progressed with their training to a RQF level 3 qualification, and must complete the qualification within 2 years.

4.3 The licence holder must provide and ensure the implementation of a written training policy for all staff.

The training policy must be reviewed and updated annually, and must include:

- an annual appraisal
- planned continued professional development
- recognition of any knowledge gaps

This applies to all staff including the licence holder.

Staff participation can be shown by:

- records of the courses they are taking
- records of the training they have taken
- records of any assessments and results or developments for specific breeds
- annual appraisal documents

Evidence of staff attendance or completion of the training must be provided.

Required higher standard for staffing
There must be at least one full time member of staff per 8 dogs.

Optional higher standard for staffing
There must be a member of permanent, full-time staff with an appropriate Ofqual regulated Level 3 qualification.

5.0 Suitable environment

5.1 All areas, equipment and appliances that animals can access must present minimal risks of injury, illness and escape.

They must be constructed in materials that are:

- robust
- safe and durable
- in a good state of repair
- free from damage

The premises must be well maintained and in good condition. Internal doors should open towards a wall (stop getting out and opening onto people. Where this is not possible, a safety procedure must be in place.

Each designated home boarding room must have a safe cooking, full height door that cannot be left ajar. Dogs must be able to see their owner through the door. They must be able to sit in front of it.

Electrical sockets and appliances must be safe and secure.

All kitchen surfaces that dogs can access must be cleaned regularly and kept in good condition. Food preparation surfaces must be cleaned, sanitised and maintained. Floors must be non-slip.

There must be no standing water from cleaning, or urine on floors.

There must be no sharp or rough edges, projections, or other hazards, such as chemicals and loose cables in areas where dogs could get hurt.

Doors, gates and windows must be fitted with secure, lockable and reliable to avoid dogs escaping, damaging fabric or getting hurt.

Ventilation by the dogs must have access to keep and any key codes in case of emergency.

Drains must always be clear and fluids can directly into them. Drain covers should be safe so they do not trap paws and claws.

Outdoor fencing should be strong and rigid. A dog must not be able to dig under it. Any wire mesh out of at least 2.5 millimetres thick (British Standard 6 gauge wire mesh). The mesh size must be less than 50 millimetres by 75 millimetres.

Fencing must be maintained to be secure and maintained. It should be smooth and sealed to avoid injuries.

Damaged wood must be over-clad or sealed.

Any outdoor fencing that dogs may come into contact with must be treated against rot with non-toxic products, such as fence posts.

5.2 Animals must be kept at all times in an environment suitable to their species and condition (including health status and age) with respect to:

(1) their behavioural needs

(2) its situation, space, air quality, cleanliness and temperature

(3) the water quality (where relevant)

(4) noise levels

(5) light levels

(6) ventilation

Dogs must be provided with a space where the temperature may cause them distress. Kennels should be between 10°C and 26°C.

Dogs must be checked to see if they are too hot or too cold. If a dog is showing signs of discomfort, steps must be taken for its welfare. A dog must be able to move away from a direct source of heat.

Inside areas must be well ventilated to avoid excess humidity and be draught free.

Heaters and electrical equipment must not be placed where they could burn, electrocute or give an electric shock to a dog or human. They must not be placed where dogs can chew on them. Dogs must be able to move away from a direct source of heat.

Dogs must not be exposed to temperatures that cause them distress.

5.3 Staff must ensure that the animals are kept clean and comfortable.

There must be sufficient clean resting places to provide comfort and warmth for every dog.

Dogs should have a proximity and health check regime agreed with the owner, such as asking owners as a waiting list to check nothing. Attention must be paid to the dog's coat, teeth, ears and eyes, and to check for parasites.

5.4 Where appropriate for the species, a bedding area and opportunities for bedding must be provided.

Dogs must have regular opportunities during the day for toileting in an outside secure area or part of the exercise. Each dog's individual needs should be taken into account.

5.5 Procedures must be in place to make sure housing and any equipment is cleaned as often as necessary and good hygiene standards are maintained. The housing must be capable of being thoroughly cleaned and disinfected.

Designated rooms must be inspected at least once a day and kept clean, in accordance with the documented cleaning and disinfection procedure.

Dogs must be moved from the area while it is being cleaned.

Faeces must be removed from areas at least twice a day, but as often as necessary.

Where a pest problem is identified, a control programme must be implemented.

5.6 The animals must be transported and handled in a manner (including by means of equipment) that does not cause them unnecessary pain and frequency that protects them from pain, suffering, injury and disease.

The licence holder must demonstrate that a suitable vehicle is available to transport the dogs. It does not have to be owned by the licence holder. Transport must comply with the existing legal requirements.

During transport, dogs must be maintained using a dog crate, transport harness or dog restraint. Dogs must be transported in a way that does not cause them distress or injury, around freely inside. Crates must be well ventilated and firmly secured. Dogs should not be out of direct sunlight and keep their heads resting.

Vehicles must be regularly cleaned and disinfected.

Dogs must not be left in vehicles for unreasonable periods. They must never be left unattended in a vehicle for more than 24 hours. Dogs should be fed and watered at least daily of the day. The licence holder should ask about whether it is necessary to transport dogs when the temperature poses a risk to the health of the dog.

Journey must include sufficient breaks for water, food and toileting.

If the business includes a collection and delivery service, dogs must be on a lead outside the vehicle to limit their escaping.

Dogs must be transported to vet facilities in an appropriate manner for their condition and in accordance with the Animal Welfare (Transport) Regulations of the animal and suitability for transport should be sought before transport.

5.7 All the animals must be easily accessible to staff and for inspection. There must be sufficient light for the staff to work effectively and observe the animals.

There must be good light to allow staff to check the facility where the dogs can go. Where natural light is not sufficient, there must be a suitable artificial light source. Where artificial lights are used, there must be 50 to 55 hours of light daily.

Lights must be turned off at night to provide a period of darkness.

5.8 All resources must be provided in such a way (for example, as regards frequency, quantity, distribution and competition between competitors or the dominance of individual animals.

In a commercial area, there must be multiple resources such as:

- food
- water
- environment boxes
- resting and sleeping areas

The number of each item provided must be at least the same as the number of dogs in the room.

Dogs must be monitored to ensure adequate amounts of feeding times.

5.9 The animals must not be left unattended in any situation or for any period of time that is likely to cause them distress.

Dogs must have human company. They must not be routinely left alone for more than 3 hours at a time. Dogs should be provided with a suitable environment that promotes safety and better of an individual dog. All dogs should be provided with enrichment and companion staff.

Optional higher standards for providing a suitable environment for dogs
Ventilation must be a managed. Fixed or portable, an system to maintain temperature between 10°C and 26°C in an air conditioning unit or removeable fan installed safely and properly fitted.

There must be a designated other person or member of staff who can cover any emergency, so that the dogs are never left alone.

6.0 Suitable diet

6.1 The animals must be provided with a suitable diet in terms of quantity, quality and variety. Any new foods must be introduced gradually to allow the animal to adjust.

Adult dogs must be fed at least once per day according to the individual dog's needs. Their diet must be balanced and age and breed specific.

If there are concerns about a dog's diet the owners must be informed and veterinary advice sought.

Dogs must be separated at feeding time unless the owner has allowed this by written permission.

6.2 Feed and (where appropriate) water intake must be monitored, and any problems recorded and addressed.

Dogs must be monitored and if they cannot eat for longer than 24 hours, veterinary advice must be sought.

The amount of water a dog drinks must be checked. The owner must be told if the dog is drinking too much or not enough.

The general condition of a long dog dogs must be monitored and dogs displaying significant weight loss or gain, must be checked by a vet and treated as necessary.

The facility must follow veterinary advice when feeding debilitated, underweight or ill dogs, or those with specific diets.

6.3 Feed and drinking water provided for the animals must be unspoiled and free from contamination.

Food bowls should be emptied and cleaned following feeding so that food, particularly wet food, is not left and feed the next feeding time.

The facility must have hygiene procedure in place to stop food. Food must be stored away from animals and in cool and dry places.

6.4 Feed and drinking receptacles must be capable of being cleaned and disinfected, or disposable.

The equipment used to serve food or drink to the dogs must be:

- non-porous
- easy to clean
- disinfected at least once a week
- disposed of or fixed if damaged

6.5 Consistent access to fresh, clean drinking water must be provided in a suitable receptacle for the species that requires it.

Dogs must have fresh, clean drinking water daily. The container must be clean and changed or refreshed as often as necessary.

There must be multiple water bowls. 50 dogs must have easy access to water.

6.6 Where feed is prepared at the premises, there must be hygienic facilities for its preparation including a working surface, hot and cold running water and storage.

There must be a separate hand wash basin with hot and cold water for staff to wash their hands. This needs to be connected to a drainage system.

Soap and hygienic hand drying facilities must also be available.

Food preparation must be in a separate area from where the animals are kept.

Food must be prepared in accordance with the manufacturer's instructions and be fed to the animals in accordance with their requirements.

Food must be prepared in a way that does not cause the animals unnecessary pain, suffering, injury or disease

7.0 Monitoring behaviour and training

7.1 Active and effective environmental enrichment must be provided to the animals in inside and any outside environments.

A facility must create a written programme that shows how they provide an enriching environment suitable for the animals. This must be agreed with the owner.

The programme will show how the facility will provide:

- sociability
- socialisation
- play

All dogs must receive appropriate toys or feeding enrichment (or both) unless veterinary advice suggests otherwise.

Toys must be checked daily to ensure they stay safe and must not be left with dogs when staff are not on the premises.

Competition between dogs must be avoided.

7.2 For species whose welfare depends partly or exercise, opportunities to exercise freely and perform normal behaviour patterns must be provided in enclosures which have a suitable size and shape.

Dogs must have at least one walk per day. Consideration must be given to the dogs physical and mental health and current fitness when deciding on the length of exercise.

A dog walker may walk no more than 6 dogs at the same time. The owner must consent to their dog being walked in groups. Dogs must be fastened with a harness (whenever).

Dogs that cannot be exercised must be given other forms of mental stimulation.

Outdoor areas must not be used by more than one dog at any one time, unless they are from the same household, or the owner has allowed this by written consent.

The outdoor area must be cleaned of all hazards after each use. Faeces must be picked up between dogs using an area.

Where artificial turf is used, it must be kept in good repair and a dog must not be able to dig under it.

Dogs must not be able to get to the fence. The outdoor or garden area of the facility and any other areas that the dogs can access must be secure and safe.

Dogs must not have unsupervised access to ponds, pools, wells and any other features that might pose a risk.

7.3 The animals' behaviour and any changes of behaviour must be monitored. Advice must be sought from a veterinarian if changes in behaviour. The facility must also ask the veterinarian competent to give such advice if adverse or unusual behaviour is observed.

All staff must be able to read unusual behaviour, and in particular dogs that are anxious or frightened of contact.

The behaviour of each dog must be monitored every day. Changes of behaviour must be recorded and the owner must be told if there are signs of:

- suffering
- stress
- pain
- aggression
- anxiety

If a dog shows signs of nerves, stress or fear, or is likely to, they should be taken somewhere suitable within the facility.

The staff should pay further attention to dogs that are:

- elderly
- nervous
- on medication

7.4 Where used, training methods or equipment must not cause pain, suffering or injury.

Training must be reward-based that rewards good behaviour and ignores unwanted behaviour.

7.5 All immature animals must be given suitable and adequate opportunities to:

(i) learn how to interact with people, their own species and other animals when such interaction benefits their welfare

(ii) become habituated to noises, objects and activities in their environment

There must be enrichment available to allow for dogs that are under one year of age.

Required higher standard for monitoring dogs' behaviour and training

There must be a clear plan setting out 2 activities per dog for a minimum of 20 minutes per day. The plan must be based on the dog's breed and history, and should be carried out exercises that are appropriate for the same periods of time.

Optional higher standard for monitoring dog's behaviour and training

Any outside space will have 2 separate areas(at least) between dogs and any and will

8.0 Animal handling and interactions

8.1 All people responsible for the care of the animals must be competent in the handling and handling of such animals to protect it from pain, suffering, fear or distress.

Dogs must always be handled humanely and in a way that is suitable for their individual needs. This is to minimise fear, stress, pain or distress. Dogs must never be punished so that they become frightened or display agitated behaviour.

Anyone caring for human beaded dogs, including anyone in the household uses the age range 18 to 65 unless supervised by a competent person. This must be able to recognise and deal with unreasonable behaviour.

8.2 The animals must be kept separately or in suitable compatible social groups appropriate to the needs of individual animals. No animal from a social species may be isolated or separated from others of their species for any longer than is necessary.

A policy must be in place to monitor new dogs coming into the home boarding establishment.

It must be possible to keep new dogs at the facility away from other dogs if it is required. The inspector must be shown how this is done.

It is not recommended that cats are kept in the premises. If there are isolated cats, the facility must show how they will keep them separate from the dogs and other cats. Cats are able to reduce the menace of dogs to protect the cat's welfare.

Small pets must be kept separate from home boarding dogs. For example, in an area of work which the dog cannot access. Animals might be in the garden or outdoor exercise area (such as rabbits and guinea pigs) must be able to be kept separate and away from boarding dogs. The owner must show that the welfare needs of small pets are being met.

8.3 The animals must have at least daily opportunities to interact with people where such interaction benefits their welfare.

Animals should be encouraged, but never be forced to interact with people.

9.0 Protection from pain, suffering, injury and disease

9.1 Written procedures must:

(a) be in place and implemented covering:

(i) feeding regimes

(ii) cleaning regimes

(iii) hygiene practices

(iv) the prevention of, and control of the spread of, disease

(v) monitoring and ensuring the health and welfare of all the animals

(vi) the death or escape of an animal (including the storage of carcasses)

(b) be in place covering the care of the animals following the suspension or revocation of the licence or during an emergency

The procedures must show how the facility will meet these conditions.

9.2 All people responsible for the care of the animals must be made fully aware of these procedures.

9.3 Dependants isolation, in separate self contained facilities, must be available for the care of sick, injured or potentially infectious animals.

The isolation facilities must be secure and suitable for any signs of illness when receiving a new dog at the premises. An animal showing any signs of illness must not be accepted into the premises. The facility must ask the owner to take the animal elsewhere if any illness develops within the dog's home boarding.

The facility must be able to isolate sick or injured dogs, or those that might be carrying serious infectious disease.

If the isolation facility is at another location, such as a local veterinary practice, the premises must be able to show evidence that this is ready to use if the facility is not within from the pre-hold.

All staff must understand the procedures to prevent the spread of infectious disease between infected animals and other dogs.

Infectious disease is present when the animals:

- the facility must use barrier nursing procedures, and people trained in these
- staff should wear protective clothing and footwear (where applicable) and change these between each animal
- equipment must be cleaned separately
- equipment must be disinfected

Dogs showing signs of infectious disease must not be allowed in any shared outside exercise area.

Protective clothing and footwear must be worn when handling dogs in the isolation facility, and correct sanitation rules must be followed. Separate heating and water systems in the isolation facility are recommended.

Dogs showing signs of infectious disease must not be allowed in any shared outside exercise area.

Protective clothing and footwear must be worn when handling dogs in the isolation facility, and correct sanitation rules must be followed. Separate heating and water systems in the isolation facility are recommended.

Staff must check on dogs in isolation at least as often as other dogs. Unless a separate person is looking after dogs, dogs in isolation must be checked after other dogs.

9.4 All reasonable precautions must be taken to prevent and control the spread among animals and people of infectious disease, pathogens and parasites.

An up-to-date veterinary vaccination record must be seen to show that dogs, including resident dogs, have current vaccinations against:

- canine parvovirus
- canine distemper
- canine infectious hepatitis (adenovirus)
- leptospirosis
- other relevant diseases

Vaccination against other diseases such as kennel cough (bordetella bronchiseptica or canine parainfluenza virus) may be required.

A vet certificate of a recent protective titre test may be accepted instead of a booster vaccination. The certificate must state that it is valid for the current period. It is up to the owner to decide whether to accept such certificates.

Previous vaccination courses must be completed at least 2 weeks before a stay/boarding.

Vaccines must have been given not less than 24. Homeopathic vaccinations are not acceptable.

If there is evidence of external parasites such as fleas, ticks or lice, the dog must be treated with an appropriate product authorised by the Veterinary Medicines Directorate (VMD) and licensed for use on dogs. The owner must be informed of the action that is going to be taken. The owner must consent to this.

9.5 Microchip and tattooing for diagnosis must be stored and disposed of in a hygienic manner and in accordance with any relevant legislation.

Dog waste and toilet training must be put in a clearly marked bin. This must be emptied either daily or when full, whichever is sooner. Dog waste must be removed in accordance with the documented cleaning and disinfection procedures.

All dog waste must be stored away from areas where animals or food are kept.

9.6 Sick or injured animals must receive prompt attention from a vet or, in the case of a dog, a competent person. Injured animals must be kept in a safe place, out of the sight of other, that competent person must be followed.

If the facility's trained first aider suspects that a dog is ill or injured, it will must be contacted immediately. Dog instructions for treatment must be recorded. If there is an ongoing concern, the facility must seek veterinary advice.

9.7 Where necessary, animals must receive preventative treatment by an appropriately competent person.

Any treatment must have consent of the owner and direction from a vet.

9.8 The licence holder must register with a vet with an appropriate level of experience in the handling and care requirements of any animals specified in the licence and the contact details of that vet must be readily available to all staff in the premises used for the licensable activity.

The vet's details must be displayed where they can be seen by all staff members.

This must the include:

- name
- address
- telephone number
- out of hours telephone number

The dog owner and licence holder must agree which vet will be used. This decision must be recorded.

9.9 Prescribed medicines must be stored safely and securely to safeguard against unauthorised access, and the owner's/keeper's/handler's consent in accordance with the instructions of the vet.

All cases of treatment must be completed following the vet's instructions.

Unused medications must be returned to the owner or prescribing vet.

Medicines must be stored in a fridge at the correct temperature, where needed.

9.10 Medicines other than prescribed medicines must be stored, used and disposed of in accordance with the instructions of the manufacturer or vet.

Medicine must only be used:

- with the owner's consent
- following a discussion with a vet

9.11 Cleaning products must be suitable, safe and effective against pathogens that are relevant to the animals in the facility. Cleaning products must be used in accordance with the manufacturer's instructions and used in a way which prevents distress or suffering of the animals.

Cleaning and disinfection products must be used as per the manufacturer's instructions. Dogs must be removed from areas being cleaned. Any dog using cleaning products must be competent in the safe use of detergents and fluids. Cleaning products must be kept entirely out of dog reach and sight.

Standing water must not be allowed to accumulate. This is to avoid pathogens that can cause disease in dogs and other animals.

Grooming equipment must be kept clean and in good repair. If provided by the owner, it must only be used on that dog and must be sent home with the dog.

Toys must be cleaned and disinfected after use dog or disposed of. If provided by the owner they must be sent home with the dog.

Any equipment that has been used on an infectious or suspected infectious animal must be cleaned and disinfected after use, or disposed of.

9.12 No person may authorise an animal except a vet or a person who has been authorised by a vet and is competent for such purpose or

(b) In the case of fish, a person who is competent for such purpose

(c) In the case of horses, a person who is competent, and who holds a licence or certificate, for such purpose

(c) a person who has been authorised by a vet as competent for such purpose

Dog owners may euthanise a dog. The licence holder must keep a record of euthanasia and the identity of the qualified vet that carried it out. The owner or designated main person responsible for the care of the animal must be present and consent for the euthanasia of the dog, euthanasia must not take place without consent.

9.13 All animals must be checked at least once daily or more regularly as necessary to check for any signs of pain, suffering, injury, disease or abnormal behaviour. Vulnerable animals must be checked more frequently.

9.14 Any signs of pain, suffering, injury, disease or abnormal behaviour must be recorded and the advice and further treatment sought from a vet. In the case of fish, of an appropriately competent person(s) must be sought and followed.

Records and any checklists must be made available to inspectors.

Preventive or absence of illness and pain must be monitored daily. Anything unusual must be recorded and acted upon.

10.0 Emergencies

10.1 A written emergency plan, acceptable to the local authority, must be in place, known and available to all the people on the premises used for the licensable activity. The plan must be kept up to date and be reviewed annually. The licence holder must protect all the people and animals on the premises in case of fire or in case of other emergencies. Consideration must be given to evacuation or filtration systems or stop-cocks etc.

Entrances and exits must be clear of obstructions at all times.

Suitable firefighting, prevention and detection equipment must be provided and maintained in good working order. All buildings must have at least one working smoke detector (or other suitable fire detection system) installed in a suitable location on each floor used for the licensable activity. There must be at least one carbon monoxide detector.

A first aid kit suitable for treatment of dogs must be kept on site.

There must be a plan to house the dogs should the premises become uninhabitable.

There must be a written policy in place for dealing with emergencies, including veterinary vital and emergency contacts and abnormal weather conditions.

All electrical installations must be installed by a qualified person and maintained in a safe condition. They should be placed where they do not present a risk.

All equipment must be maintained, kept in good repair and serviced according to manufacturer's guidance.

10.2 The plan must include details of the emergency measures to be taken for the evacuation of the animals should the premises become uninhabitable and an emergency telephone list that includes the fire service and police.

10.3 External doors and gates must be lockable.

10.4 A designated key holder with access to all animal areas must at all times be within reasonable travel distance of the premises and available to attend in an emergency.

There must be a designated person available for emergencies.

A reasonable travel distance would, in most conditions, be 30 minutes or less.

Part B – Specific conditions; providing home boarding for dogs (schedule 4, part 3 of the regulations)

12.0 Home

12.1 Dogs must be accommodated within the home.

Dogs must not be boarded in outbuildings, cages or runs.

The home must have its own entrance.

In the home environment, the housing provided covers 2 areas:

- indoors - there must be sufficient space for a sleeping area for each dog, to exercise freely and perform normal behaviours. Consideration must be given to the choice of substrates for dogs
- outdoors - there must be direct access to a suitable, safe and secure area or garden, used only by the home boarder and shared with other properties

12.2 The home must include:

(a) direct access to a private, non-communal, secure and hygiene-friendly exercise area

(b) at least 2 secure physical barriers between any dog and any entrance to or exit from it

The private, non-communal space could be a garden.

There must be a barrier to stop dogs having access to any area outside the licence holders non-communal area.

If a door or gate has a mechanism that prevents opening unexpectedly from the outside (Chain or latch) then it must be replaced with a double barrier

13.0 Suitable environment

13.1 Dogs from different households may only be boarded at the same time with the written consent of every owner.

There must be a documented risk session for dogs in the familiarisation with each other they have based. This includes familiarisation with resident dogs of the property.

13.2 Each dog or dogs from the same household must be provided with its own designated room, where it can rest when they wish to.

Once dogs are familiar with each other they may want to be together and need not be stuck in their own room alone.

Dogs from the same household can be kept together with written consent from the owner.

13.3 Each dog must have a clean, comfortable and warm area within its designated room where it can rest and sleep.

The sleeping area must allow the dog to be able to sit and stand at full height, stretch, wag its tail and to walk and turn around without touching the sides. The available and clear floor area must be a minimum of three times the length of the dog's body.

All beds and bedding areas must be kept clean, dry and free of parasites.

Unless instructed by a veterinary, the owner, soft bedding materials must be provided and adapted if necessary for bed, grooming or little dogs to help regulate their temperature. If a dog has chewed or shredded its bedding, it must be replaced with an alternative.

13.4 Each designated room must have a secure window to the outside that can be opened and closed as necessary.

A device that restricts how wide a window can open must be used as necessary to prevent access and escape.

13.5 A dog must not be confined to a crate for longer than 3 hours in any 24 hour period.

13.6 A dog must not be kept in a crate unless:

(a) it is already habituated to it

(b) a crate forms part of the normal routine for the dog

(c) the dog's owner has consented to the use of a crate

If a crate is used, it must be of a suitable size and construction.

Some dogs may choose to sleep in their crate during the day and overnight. The crate door must be left open to allow the dog to choose where it sleeps.

13.7 Dog owners which a dog is kept must be in good condition and sufficiently large for the dog to sit and stand in it full length, lie flat and turn around.

Required higher standards for providing a suitable environment for dogs

Dogs should be provided with beds, including dogs at crate, there must be an overall floor area of 6 square metres for each dog. Dogs only one dog can be housed at a time unless the dogs are from the same household.

Optional higher standard for providing a suitable environment for dogs

Only dogs from the same household are housed at any one time.

14.0 Suitable Diet

14.1 Each dog must be fed separately in its designated room unless its owner has given written consent to the contrary.

15.0 Monitoring dogs' behaviour and training

15.1 Dogs must be provided with appropriate toys and enrichment to prevent boredom and to encourage natural behaviours. Toys must be cleaned and disinfected between each use. Toys must be kept in a clean, safe and hygienic condition. Dog toys must be kept in a clean, safe and hygienic condition. Dog toys can be kept in a clean, safe and hygienic condition. Dog toys must be kept. Dogs only

Required higher standards for providing a suitable environment for dogs

Dogs should be provided with beds, including dogs at crate, there must be an overall floor area of 6 square metres for each dog. Dogs only one dog can be housed at a time unless the dogs are from the same household.

Optional higher standard for providing a suitable environment for dogs

Only dogs from the same household are housed at any one time.

> 15.1 Any equipment that a dog is likely to be in contact with and any toy provided must not pose a risk of pain, suffering, disease or distress to the dog and must be correctly used.

Items such as leads must be removed when the dog is in the home.

A dog's items and toys must be identified and recorded as such.

Toys must be suitable for the dogs, and checked regularly to ensure they are in good condition and safe.

> 15.2 Each dog must be exercised at least once daily as appropriate for its age and health.

The owner's written consent must be obtained to:

- walk a dog outside the home environment or garden
- let a dog off the lead
- walk a dog with others other than those from its household

No more than 6 dogs can be walked at the same time.

> 15.3 Dogs which on the advice of a vet cannot be exercised must be provided with alternative forms of mental stimulation.

This can include activities such as:

- positive interaction with people
- additional forms of toy enrichment
- additional forms of food enrichment

This must take place at least twice a day.

Required higher standard for exercise
Dogs must be exercised at least twice per day. Each dog must have a written daily exercise regime including lead exercise and free running in a secure area. There must be an alternative form of enrichment planned for dogs which cannot be exercised for veterinary reasons for the same periods of time.

16.0 Housing with, or apart from, other dogs

> 16.1 Written consent must be obtained from the owner or owners (as the case may be) to keep dogs together in a designated room.

Each dog (or dogs from the same household) must still be allocated a designated room.

The licence holder must be able to separate dogs into different rooms should the need arise.

> 16.2 Unneutered bitches must be prevented from mating.

Bitches that are in season must not be accepted for boarding with dogs from other households.

Entire males must not be on the premises if an in-season bitch is boarded.

> 16.3 If any person aged under 16 years resides at the home, there must be procedures in place to regulate the interactions between the dogs and that person.

If children live on the premises, there must be a procedure in place to safeguard them and the dogs.

The licence holder must make an assessment of the risks of home boarding. This will include the risk to, or potentially caused by children who are likely to be at the property.

17.0 Records

> 17.1 A register must be kept of all the dogs at the premises which must include:

(a) the dates of each dog's arrival and departure

(b) each dog's name, age, sex, neuter status, microchip number and a description of it or its breed

(c) the number of any dogs from the same household

(d) a record of which dogs (if any) are from the same household

(e) the name, postal address, telephone number and email address of the owner of each dog and emergency contact details

(f) in relation to each dog, the name, postal address, telephone number and email address of a local contact in an emergency

(g) the name and contact details of the dog's normal vet and details of any insurance relating to the dog

(h) details of each dog's relevant medical and behavioural history, including details of any treatment administered against parasites and restrictions on exercise

(i) details of the dog's diet and related requirements

(j) consent forms

(k) a record of the date or dates of each dog's most recent vaccination, worming and flea treatments

(l) details of any medical treatment each dog is receiving

> 17.2 When outside the premises, each dog must wear an identity tag which includes the licence holder's name and contact details.

18.0 Protecting dogs from pain, injury, suffering and disease

> 18.1 Before a dog is admitted for boarding, all equipment to be used by or in relation to that dog must be cleaned and disinfected.

> 18.2 A preventative healthcare plan agreed with the vet with whom the licence holder has registered under paragraph 9(8) of Schedule 2 must be implemented.
